Educational Institute

ABOUT US

PBSPL is a leading Plumbing, Fire Protection, and MEP Contracting Company, specializing in the complete execution of building services projects on a turnkey basis. We provide end-to-end Engineering, Procurement, Supply, Installation, Testing, Commissioning (EPCC), and Maintenance services for Plumbing, Fire Fighting, Fire Alarm, Electrical, and associated MEP systems across commercial, residential, healthcare, hospitality, industrial, and institutional developments.

Our expertise covers the entire project lifecycle—from value engineering and detailed shop drawings to procurement, site execution, testing & commissioning, statutory approvals, and project handover. With a highly experienced team of engineers, project managers, supervisors, and skilled technicians, PBSPL ensures seamless coordination with all stakeholders to deliver projects safely, on time, and within budget.

Built on a strong foundation of engineering excellence, quality workmanship, and customer satisfaction, PBSPL is committed to executing every project in accordance with the latest National Building Code (NBC), NFPA, IS, ASHRAE, and other applicable international standards. Our focus on safety, quality, innovation, and sustainability enables us to deliver reliable, high-performance building services solutions that create lasting value for our clients.

VISION & MISSION

VISION

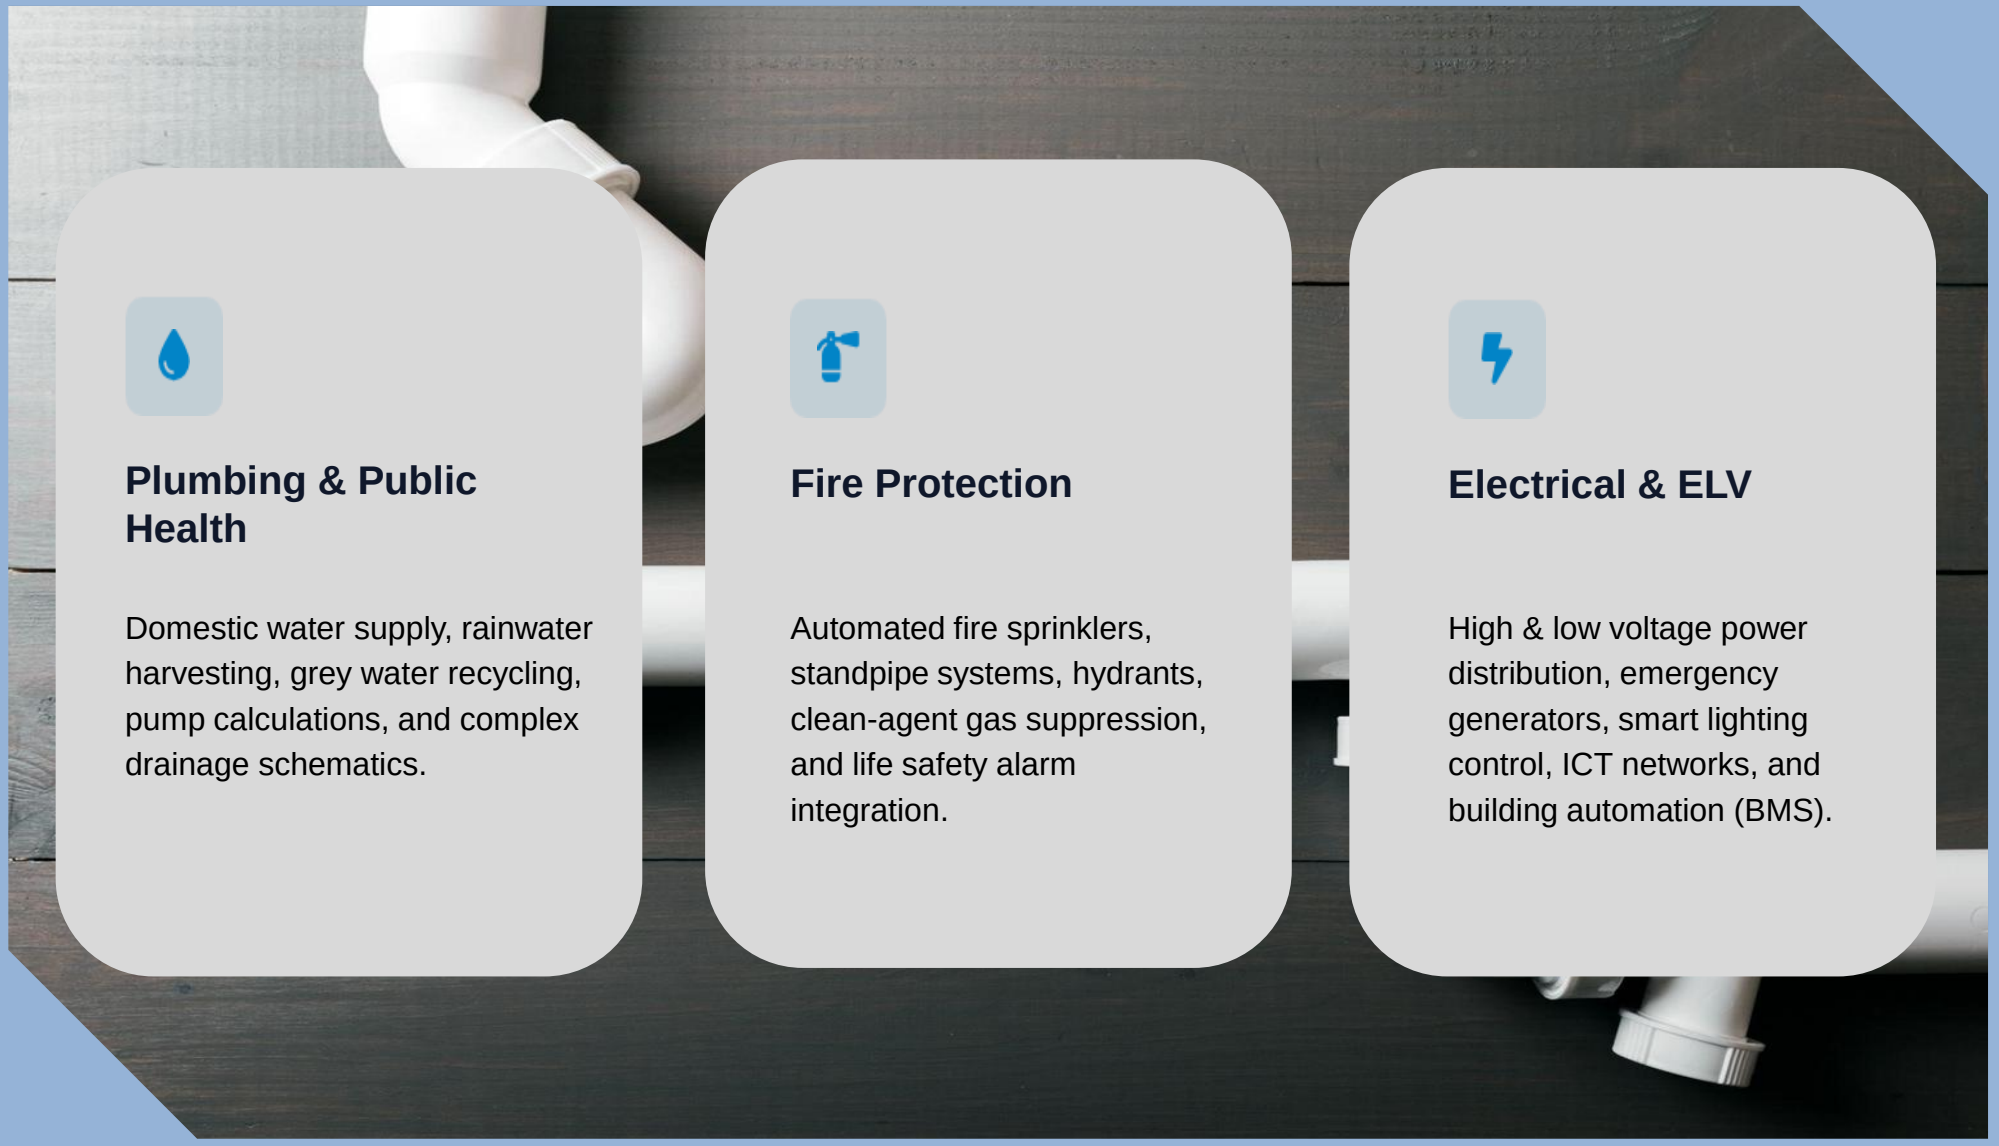

Our vision is to be a leading innovative, sustainable, and high-quality MEP Consultancy and technology services provider, driving excellence in engineering and infrastructure development.

MISSION

To be a leading provider of innovative, sustainable, and high-quality MEP solutions, driving excellence in engineering and infrastructure development

- Providing comprehensive and sustainable MEP services tailored precisely to client needs.
- Utilizing cutting-edge technology to significantly enhance efficiency and performance.
- Ensuring timely project execution with an unwavering focus on quality and reliability. Promoting eco-friendly and energy-efficient engineering practices in all our endeavours.
- Building long-term relationships with our clients through trust, excellence, and professionalism.

OUR SERVICES

Plumbing & Public Health

Domestic water supply, rainwater harvesting, grey water recycling, pump calculations, and complex drainage schematics.

Fire Protection

Automated fire sprinklers, standpipe systems, hydrants, clean-agent gas suppression, and life safety alarm integration.

Electrical & ELV

High & low voltage power distribution, emergency generators, smart lighting control, ICT networks, and building automation (BMS).

HOW WE WORK

At PBSPL, our project process is streamlined into four stages:

Planning and Design: We collaborate with clients to create detailed, compliant designs.

Procurement and Preparation: We order and inspect materials, setting up a secure site yard.

Execution and Construction: Our team builds or installs according to the approved plans, maintaining high quality and safety.

Quality Assurance and Handover: We conduct final inspections, make necessary adjustments, and hand over the completed project.

PLUMBING SYSTEM

PBSPL is one of the Pioneer Engineers and Contractors in this Profession and has already executed various major prestigious projects all over India. The company's Executive Staff and Technical Experts have already handled a vast range of Projects including Multi Storied Buildings , Hospitals, Schools, Educational Institutes, Hotels, Industrial and Commercial Buildings, Residential Complexes, Farm Houses etc. The multiple nature of jobs undertaken by the company all over India and their magnitude have given us the requisite experience for execution of all types of works.

PBSPL is a Professionally Managed firm and we have a team of highly qualified & experienced executives, Engineers, Supervisors, Foremen, Draftsmen, skilled technicians / tradesmen with enough skilled / semi skilled personnel's to execute the job. We have sufficient tools, plants, and equipment's to cater for the work. We are financially sound and enjoy the good support of Leading Manufacturers and dealers in the respective trade.

PLUMBING SERVICES

Services We Provide:

- Sanitary and storm water drainage installations, repairs and relining
- New water service installation and maintenance
- Rainwater services including tanks and pumps
- Water Treatment Plant
- Sewage Treatment Plant
- Irrigation System
- Pipe Insulation Work
- Core Cutting

FIRE PROTECTION SYSTEM

PBSPL is renowned for its expertise in installing reliable fire detection, alarm, and extinguishing systems. With our services we have been safeguarding businesses against fire hazards and recognized as one of India’s premier fire protection system providers, PBSPL offers comprehensive turnkey solutions tailored to your specific business requirements, leveraging our in-house design team. Backed by a team of top-notch engineers and professionals, we are committed to swift project completion without compromising on quality.

FIRE PROTECTION SYSTEM

PBSPL offers integrated fire safety solutions which help meet the challenges of effective fire suppression. In addition to FPS, we undertake fire sprinkler systems, suppressions and FM200 systems. Our team always ensures to keep abreast of various standards, codes, and zonal regulations so that your fire protection system is designed in accordance with them.

We don’t just stop there; we carry out regular inspections and safety procedure checks to ensure all systems are functioning perfectly in the event of a fire. Safety is our number one priority when it comes to protecting human life and assets. Our top mission is to prioritize the lives of every individual as well as their valuable assets.

TYPES OF FIRE PROTECTION SYSTEM WE PROVIDE

- Fire Sprinkler Systems
- Fire Alarm and Fire Detection Systems
- Fire Suppression Systems – Wet and dry chemical agents, Deluge systems
- Special Hazard Fire Protection Systems – FOAM, CO2 and CHEMICAL
- FM-200

ELECTRICAL & LOW VOLTAGE SYSTEM

PBSPL has operations in industrial, commercial and Residential - boasting experience and expertise in electrical infrastructure, construction, installation and maintenance. We are equipped to respond to all electrical supply, repairs, installation and maintenance needs for electrical, mechanical, and fibre optic challenges.

From high-voltage sub-stations and load balancing to extra-low voltage (ELV) security and fiber optics, our designs prioritize maximum electrical safety, low voltage drop, and future scalability.

WE ARE TYPICALLY INVOLVED WITH INSTALLATIONS IN THE FOLLOWING TYPES OF PREMISES:-

- Residential and Commercial Buildings
- Healthcare
- Educational Institutions
- Factories & warehouses

ADVANCED BIM CAPABILITIES

DIGITAL TWIN

BIM & DIGITAL TWIN

Utilizing BIM software's, we construct virtual 3D models from LOD 100 through LOD 500 (As-Built & Facility Management).

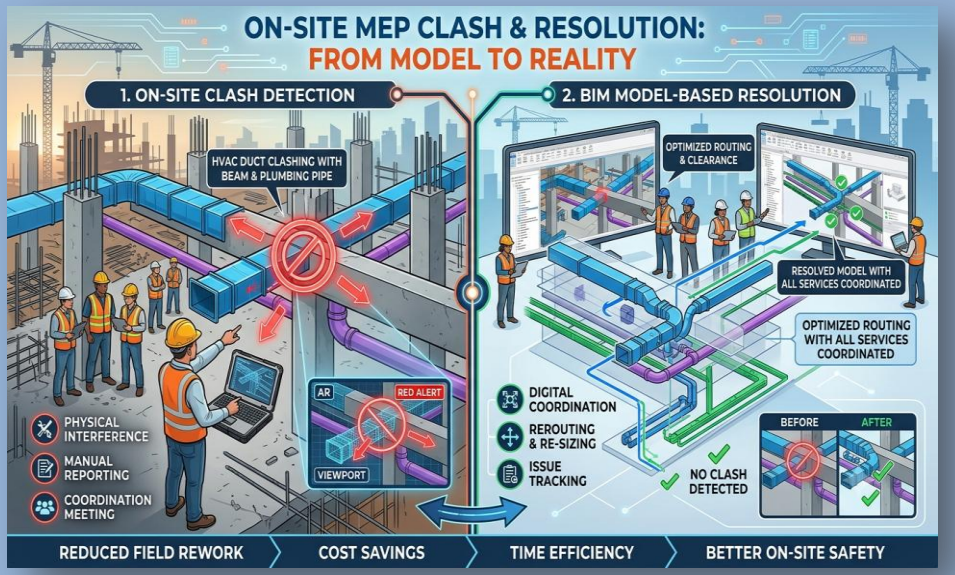

By resolving spatial conflicts between structural, mechanical, electrical, and plumbing trades in pre-construction, we reduce field re-work orders by up to 95% and accelerate project delivery timelines.

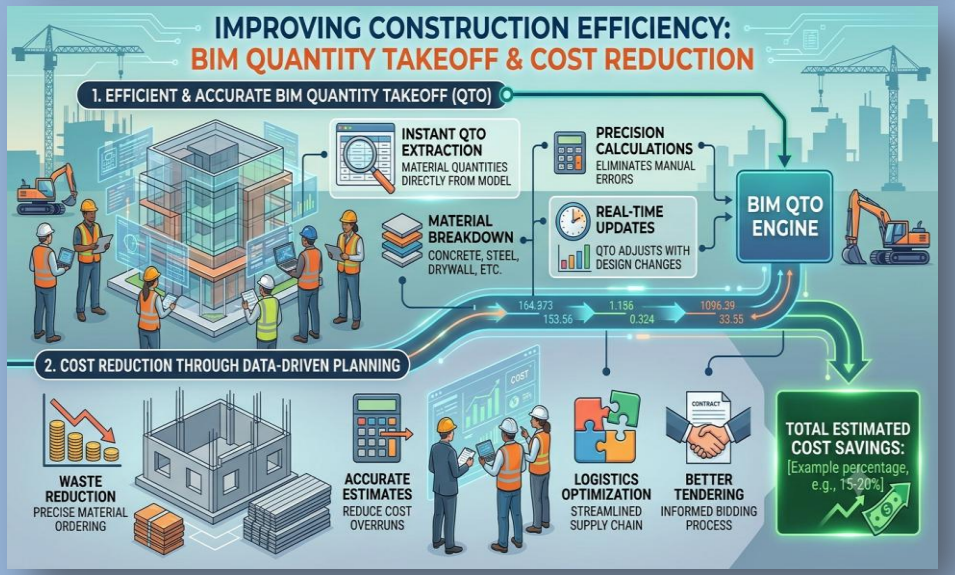

100%

Clash-Free Virtual Models

BENEFITS OF BIM IN CONSTRUCTION

- **Improved Collaboration & Communication:** Real-time information sharing across all teams.
- **Cost & Time Reduction:** Streamlined processes that lead to significant savings.
- **Enhanced Visualization & Design:** 3D modelling that allows for virtual walkthroughs and better design comprehension.
- **Clash Detection & Risk Mitigation:** Identifying and resolving design conflicts before construction begins.
- **Facility Management & Operations:** Utilizing digital twins for on-going maintenance.
- **Sustainability & Quantity Take-offs:** Promoting green building practices and precise resource planning.

KEY INDUSTRY SECTOR SERVED

Commercial Towers

High-rise office buildings, shopping malls, and mixed-use real estate complexes.

Healthcare & Labs

Hospitals, pharmaceutical cleanrooms, and medical research facilities.

Industrial & Energy

Manufacturing plants, logistics hubs, data centers, and infrastructure facilities.
